module **One**

Class 04

What are operators

Operators are building block of an expression

Arithmetic operators (+, -, *, /, //, **, %)

only works in numbers datatype

(num1 + num2)

Assignment operators/ shorthand operators

Used to assign value to a variable

types of assignment operators

+= , -= , *= , /= , %= , //=

String also use some operators but working is different

concatenation (+)

multiplication(*)

sting also uses some logical operators we will see them in

further classes while solving questions
